PROPYLENE GLYCOL DIOLEATE (PGDO)

Appearance	:	Clear yellow to amber coloured liquid
Acid Value	:	4.0 max.
Saponification Value:		180.0 min.
Iodine Value	:	80 – 90
Moisture	:	1% max.
End use	:	Raw material for fat liquors. PGDO can be easily sulfited and then blended with other oils to produce fat liquors of some unique and desirable properties. Specifically, it produces rancidity free fat liquors which soften and lubricate the leathers without loading them. The sulfited PGDO can also be a functional substitute for sperm oil.
Packing	:	90 kgs net Carboys 180 kgs net Carboys
Safety	:	PGDO is absolutely harmless and can be considered as safe as vegetable oil for storage purpose.

(*Product to meet specific Iodine Value requirement can also be offered.)
